Faiz brings rich experience in the area of Enterprise Application Integrations, Cross-Platform Migrations, Legacy Migrations and Production Support Infrastructure and is said to play a key role in company's overall strategy and future direction.*

Livonia, Michigan, Jan 23, 2013 -

SoftPath Technologies today announced that Mr. Faizulla Shaik had joined as the company's new Vice President of Research and Development. As a member of the senior management team, Faiz is expected to play a key role in company's overall strategy and future direction.

With over a decade of experience, Faiz has been focused in the area of Enterprise Application Integrations, Cross-Platform Migrations, Legacy Migrations and Production Support Infrastructure. He has executed numerous projects across technologies and has been a passionate champion of Software Engineering Practices with particular focus on Agile. He is known for his zeal for engineering quality and customer retention practices. Apart from engineering responsibilities, he has played a key role in employee hiring and retention, employee mentoring and training and team building.

Commenting on his joining the team, a company spokesperson said, "We are very excited with Faiz joining the team. His passion for software engineering, engineering quality and people centric ideas align well with what we at SoftPath Technologies have all along promoted. Faiz will play an important role in aligning our core business functional areas of Engineering, Sales, Marketing and Recruitment and help us drive our revenues further."

Earlier to this role at SoftPath Technologies, Faiz was Manager, Software Development Engineering at Blue Coat Systems, a Sunnyvale; US based company and a leading provider of Web security and WAN optimization solutions. This was preceded by a long stint at S7 Software which he co-founded and was sold to Blue Coat Systems.

About SoftPath Technologies - SoftPath Technologies is focused in the area of Business Process Management (BPM), Workflow and Case Management and Application Integrations & SOA based Services and Solutions. SoftPath Technologies helps its customers to re-engineer and automate their core business processes, streamline their IT Infrastructure Management and integrate their scattered & heterogeneous IT Application Infrastructure, by providing Application Integration and SOA solutions.
